HTDispalyDll SDK

Function : HTDrawGrid for draw gird

```
DLL_API void WINAPI HTDrawGrid(
        HDC hDC, //handle
        int nLeft,// the left of the rect
        int nTop, // the top of the rect
        int nRight, // the right of the rect
        int nBottom, // the bottom of the rect
        USHORT nHoriGridNum, // the number of horizontal grid
        USHORT nVertGridNum,// the number of vertical grid
        USHORT nBright,// the bright of the line
        USHORT IsGrid // whether draw grid scale
        );
```

Function : HTDrawWaveInYT，for VC++

```
DLL_API void WINAPI HTDrawWaveInYT(
        HDC hDC, // handle
        RECT Rect, // the rect for drawing
        COLORREF clrRGB,// the color of the line
        USHORT nDisType,// display type : Line or Dot
        short* pSrcData, // the source data for drawing
        ULONG nSrcDataLen, //the source data length
        ULONG nDisDataLen,// the display length data for drawing
        ULONG nCenterData,// half of the source data
        USHORT nDisLeverPos, //the display position (Zero Level)
        double dbHorizontal,// the horizontal factor of zoom out/in
        double dbVertical,// the vertical factor of zoom out/in
        USHORT nYTFormat,//format: normal or scan
        ULONG nScanLen,// the scan data length, only invalidate in scan mode
        int nCH//channel selected
        );
```

Function : HTDrawWaveInYTVB，for VB , the same with VC HTDrawWaveInYT

```
DLL_API void WINAPI HTDrawWaveInYTVB(
            HDC hDC,
            int left,
            int top,
            int right,
            int bottom,
            USHORT R,
            USHORT G,
            USHORT B,
            USHORT nDisType,
```

```
    short* pSrcData,
    ULONG nSrcDataLen,
    ULONG nDisDataLen,
    ULONG nCenterData,
    USHORT nDisLeverPos,
    double dbHorizontal,
    double dbVertical,
    USHORT nYTFormat,
    ULONG nScanLen,
    int nCH,
);
```
